HANDCRAFTED GOLF COURSE FURNISHINGS

SPRING 2026 · VANCOUVER, BC

THE SMALL PIECES

Most of what lives on the course is an afterthought.

Walk most courses and the tee markers, yardage posts, hole signage, and plaques feel sourced rather than designed. Different suppliers, different materials, different moments. Over time the details drift away from the rest of the course.

18th Grain makes those small pieces with the same intention as the course itself. One course, one design language, one maker.

FOUR PRODUCTS, EACH COMMISSIONED

What we make.

Tee markers

Per-hole or per-course designs in Canadian hardwoods with exterior and marine grade finish systems.

Yardage markers

Fairway and distance markers built to read clearly from the turf and hold up to a season of play.

Plaques

Hole-in-one, member milestone, donor, and commemorative plaques for clubhouse and on-course display.

Course signage

Directional, informational, and feature signage designed as part of the course's visual language.

THE STUDIO

A design-forward studio built for golf.

18th Grain works with Canadian hardwoods and advanced material compositions. Each piece is developed in a state-of-the-art workshop equipped with laser cutters, CNC machinery, 3D printing technology, and precision German-engineered cutting systems.

This integrated production environment enables rapid prototyping, tight tolerances, and efficient iteration, allowing the studio to move seamlessly from concept to production while delivering consistent, high-quality results for modern golf environments.

Led by Benjamin McLaughlin. Award-winning artist and designer, Vancouver BC. Fifteen years in practice, twenty years studying design.

CONCEPT TO COURSE

How we work.

01

Brief

We walk the course, talk through the product scope, and agree on the feel and materials.

03

Design rendering

A detailed rendering of each piece in the exact wood, finish, and hardware. Approved before production.

02

Design

Concept direction and material specification for your review. Two or three options, not thirty.

04

Production and delivery

Made in the Vancouver studio. Delivered to your schedule.

WHY IT MATTERS

Commissioned, not catalogued.

OFF THE SHELF

Standard form

One of a thousand identical pieces sitting on ten thousand tees.

Generic material

Plastic, painted aluminum, printed vinyl. Chosen for throughput, not longevity.

No course logic

The piece wasn't designed for your course. It was designed for any course.

Fast to replace, fast to age

Replaced on a two or three year cycle. Looks tired long before it is.

18TH GRAIN

Made for one course

Designed around your hole names, colours, materials, and feel.

Canadian hardwoods

Matched grain and species across a set. Exterior and marine grade finish system.

Built to last

CNC-fabricated, hand-finished, engineered for weather, UV, and turf contact.

One maker, one studio

From brief to delivery, the same studio produces every piece.

The Products

Most items are available in a range of locally sourced hardwoods including walnut, maple, cedar, oak, and elm. Ask about material options for any product.

01

Tee Markers

Designed and built for your tee boxes. Each set commissioned for a specific course.

FLAGSHIP

Hexagonal Tee Marker

Inlay stripe with engraved crest. Solid walnut.

SIZE

13 × 2 × 4"
